

Position Description – Health Disparities Research

Position Type: Career Scientist

Openings: One position

Requirements

Degree: MD, PhD (or equivalent)

Field of Study: Various

Board Certification: Not applicable

Research Interests

Research directed towards promoting health equity and eliminating health disparities, which may include quantification of disparities, identification of mechanisms responsible for disparities, and development and testing of methods to eliminate disparities.

Credentials

An outstanding mid-career or senior investigator as evidenced by:

- Academic rank of associate professor or professor
- National/international recognition in health disparities research as evidenced by visiting professorships and/or presentations at national symposia or workshops
- Proven track record of extramural (NIH or equivalent) peer-reviewed grant funding
- Demonstrated ability to serve as a mentor to inspire and guide others in health disparities research
- Demonstrated leadership abilities and capabilities to work within in a collaborative, trans-disciplinary team environment
- Evidence of substantive and ongoing contributions to the health disparities research field in the form of peer reviewed publications
- Demonstrated ability to interact effectively with practicing clinicians interested in health disparities

College of Medicine, Mayo Clinic

Faculty Position in Health Disparities Research

The Mayo Clinic seeks an outstanding research investigator in the science of health disparities research at the associate professor level or above. The successful applicant would be expected to play a leadership role in a comprehensive, significant institution-wide effort to address health disparities at a local and national level. This is a career scientist position (equivalent to tenure track) and includes a competitive start-up package, benefits, and ongoing operating support. Mayo Clinic supports an existing infrastructure of community outreach and health disparities research. Credentials of successful applicants will include national/international recognition in the field and a track record of NIH or equivalent peer-reviewed grant funding. Investigators with expertise in behavioral sciences, partnering with community members, and effectively working with clinical practices are particularly encouraged to apply.

Mayo Clinic is a not-for-profit organization with integrated research, education and clinical practice activities on a multi-campus environment. To learn more about Mayo Clinic, please visit www.mayoclinic.org

A curriculum vitae, selected publications, and a statement of research interests should be submitted by August 30, 2009 to:

Janet Beckman
Anesthesiology Research
Mayo Clinic
200 First Street SW
Rochester, MN 55905
jbeckman@mayo.edu
